STORAGE SOLUTIONS

SAVE TIME. SAVE SPACE.

AR LS

LONGSPAN
SHELVING

The hand-loaded or order-picking storage system is the ideal solution for manually storing of small to medium-sized non-palletised products.

The range of accessories and possible configurations allow the system to be modulated and tailored to any type of goods.

It is a selective system, enabling immediate access to all stored unit loads and SKUs.

Although it is a manually loaded system, it takes the full height of the facility, the use of mechanical means (S/R cranes or order-picking trucks) or of walkways located inside the shelving system allows easy access to the highest levels.

- **HAND LOADED**
- **OPTIMISED SPACE**
- **CARDBOARD BOXES, PLASTIC BINS, BULK STORAGE**
- **VARIETY OF ACCESSORIES**

Applications

- Spare parts, automotive parts, paints, etc.
- Industrial and hardware supplies
- Merchandising
- Chemists warehouse
- Supermarkets, Cash & Carry
- Distribution of electrical supplies
- Etc.

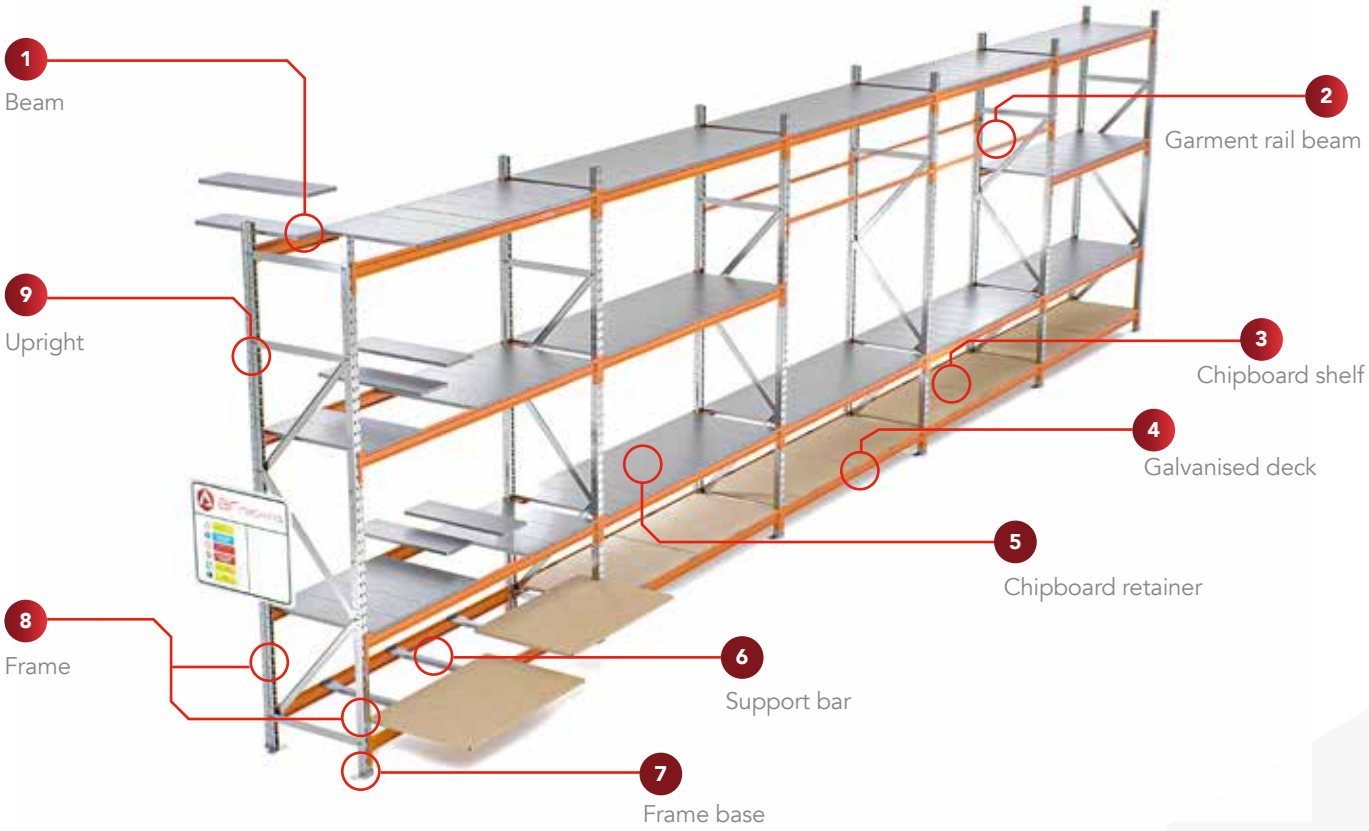

Characteristics

- Direct access to all unit loads stored and visual contact to all products.
- Easy adjustment of beam levels every 50 mm.
- Steel or chipboard shelf panels.
- Wide variety of accessories to suit any storage needs: dividers, garment hanging rails, wire mesh shelves, and more.
- Specific machines can be implemented to maximise both floor and height space, miniload and narrow aisle installations aided by order-picking.
- Galvanised finish that guarantees high corrosion resistance and greater system durability.

Main advantages

- **STRONG**: It is the most robust hand-loaded system in the market, enabling mezzanines and multi-tiers to be dimensioned on the shelving system itself.
- **HIGH LOAD CAPACITY**
- **AGILE**: Easy to assemble and to replace/add components.
- **ADAPTABLE**: Wide range of bays and shelf depths.
